SFWMD, UF Offer Water-Saving Irrigation Workshop

Advanced tools help protect regional water resources

WHAT: The South Florida Water Management District (SFWMD) and the Florida Automated Weather Network (FAWN) from the University of Florida are offering a free seminar on using advanced irrigation tools to conserve water.

Seminar attendees will learn techniques to increase irrigation efficiency while maintaining healthy crops and landscapes. The workshop is open to the public and geared toward irrigation professionals, utilities, homeowners/condominium associations, farmers and commercial and industrial maintenance staff.

SESSIONS: 9 a.m. to 12 p.m. – Urban Users ([Topics and registration](#))
1 p.m. to 4 p.m. – Agricultural Users ([Topics and registration](#))

About the South Florida Water Management District

The South Florida Water Management District is a regional, governmental agency that oversees the water resources in the southern half of the state – 16 counties from Orlando to the Keys. It is the oldest and largest of the state's five water management districts. The agency mission is to manage

and protect water resources of the region by balancing and improving water quality, flood control, natural systems and water supply. A key initiative is cleanup and restoration of the Everglades.
