

Notice of Intent to Use a Noticed General Environmental Resource Permit

Please provide complete information for the items on this application.

General Information

Please list the subsection of 40E-400, Florida Administrative Code (F.A.C.), which provides for the general permit that you propose to use:

Owner/Applicant

Name _____ Name of contact person _____

Address _____

City, State, Zip _____

Telephone () - _____

Agent (if applicable) for Owner/Applicant

Name _____ Name of Firm _____

Address _____ Telephone () - _____

City, State, Zip _____

Project Information

Project name (include the name of this phase, if applicable) _____

Total contiguous project area _____ Total area of this phase (if applicable) _____

Parcel Identification Number (from property appraiser)	County	Section(s)	Township	Range
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____

Please describe the proposed work:

Required Items

Please submit with this Notice one copy of:

1. A neatly drawn site plan showing:
 - a. Property boundaries and dimensions;
 - b. The name and location of any adjoining streets or roads;
 - c. Location and dimensions of any improvements including buildings, docks, paved or limerock areas, pipes, ditches, etc (distinguish between existing and proposed improvement)
 - d. For projects involving dredging or filling in wetlands or work in uplands: arrows indicating the direction of drainage from the proposed improvements;
 - e. All impervious areas and pervious areas (indicate their size (square feet));
 - f. Dimensions for all proposed works;
2. A 1:24,000 United States Geological Survey (USGS) topographic map showing the site boundaries;
3. A street map showing the location of the proposed project site, with written directions and addresses (if applicable);
4. Information that shows that you qualify for the noticed general permit and that addresses all the parameters and thresholds required in the noticed general permit.
5. Documentation of ownership evidencing that applicant owns the property that is subject to the permit. (i.e. warranty deed, etc.)

Other

Rule 40E-400, Florida Administrative Code, (F.A.C.) Subpart C (Noticed General Environmental Resource Permits), which specifies information requirements to constitute a complete Notice, is available from the District.

The proposed activities may also require approval by other state and federal agencies. This District informs other agencies about notices and permit applications received, but the responsibility for requesting approval from other agencies rests with the owner.

See page 4 for submittal addresses.

Certification

I have full knowledge of and will comply with the requirements of the noticed general permit which I am seeking under Chapter 40E-400, F.A.C. I understand that a noticed general permit is available only under limited circumstances as set forth in Chapter 40E-400, F.A.C., and that permittees are required to comply with all general conditions listed in Section 40E-400.215, F.A.C.

Applicant/Agent Signature *

Date

*Signing by someone other than the owner is also certification that the person is authorized to act as the owner's agent.

Projects in the following counties should respond to the corresponding South Florida Water Management District (SFWMD) Service Center:

40E-400.215 General Conditions for All No Notice and Noticed General Permits.

1. The terms, conditions, requirements, limitations, and restrictions set forth in this section are general permit conditions and shall be applicable to, and are binding upon the permittee for all no notice and noticed general permits in this chapter. These conditions are enforceable under part IV of Chapter 373, Florida Statutes (F.S.)
2. The general permit is valid only for the specific activity indicated. Any deviation from the specified activity and the conditions for undertaking that activity shall constitute a violation of the permit. A violation of the permit is a violation of part IV Chapter 373, F.S., and may result in suspension or revocation of the permittee's right to conduct such activity under the general permit. The District may begin legal proceedings seeking penalties or other remedies as provided by law for any violation of these conditions.
3. This general permit does not eliminate the necessity to obtain any required federal, state, local and special District authorizations prior to the start of any construction, alteration, operation, maintenance, removal or abandonment authorized by this permit. This general permit does not convey to the permittee or create in the permittee any property right, or any interest in real property, nor does it authorize any entrance upon or activities on property which is not owned or controlled by the permittee, or convey any rights or privileges other than those specified in the general permit and this chapter.
4. This general permit does not relieve the permittee from liability and penalties when the permitted activity causes harm or injury to: human health or welfare; animal, plant or aquatic life; or property. It does not allow the permittee to cause pollution in contravention of Florida Statutes and District rules.

5. The permittee is hereby advised that Section 253.77, F.S., states that a person may not commence any excavation, construction, or other activity involving the use of sovereign or other lands of the state, the title to which is vested in the Board of Trustees of the Internal Improvement Trust Fund without obtaining the required lease, license, easement, or other form of consent authorizing the proposed use. Therefore, the permittee is responsible for obtaining any necessary authorizations from the Board of Trustees prior to commencing activity on sovereignty lands or other state-owned lands.
6. The general permit may be modified, suspended or revoked in accordance with Chapter 120, and Section 373.429, F.S.
7. This permit shall not be transferred to a third party except pursuant to Section 40E-4.351, F.A.C. The permittee transferring the general permit shall remain liable for any corrective actions that may be required as a result of any permit violations prior to sale, conveyance, or other transfer of ownership or control of the permitted system or the real property at which the permitted system is located.
8. Upon reasonable notice to the permittee, District staff with proper identification shall have permission to enter, inspect, sample and test the permitted system to insure conformity with the plans and specifications approved by the permit.
9. The permittee shall maintain any permitted system in accordance with the plans submitted to the District.
10. A permittee's right to conduct a specific noticed activity under this noticed general permit is authorized for a duration of five years.
11. Construction, alteration, operation, maintenance, removal and abandonment approved by this general permit shall be conducted in a manner which does not cause violations of state water quality standards, including any antidegradation provisions of Sections 62-4.242(1)(a) and (b), 62-4.242(2), and 62-302.300, F.A.C., and any special standards for Outstanding Water and Outstanding National Resource Waters. The permittee shall implement best management practices for erosion, turbidity, and other pollution control to prevent violation of state water quality standards. Temporary erosion control measures such as sodding, mulching, and seeding shall be implemented and shall be maintained on all erodible ground areas prior to and during construction. Permanent erosion control measures such as sodding and planting of wetland species shall be completed within seven days of any construction activity. Turbidity barriers shall be installed and maintained at all locations where the possibility of transferring suspended solids into wetlands or other surface waters exists due to the permitted activity. Turbidity barriers shall remain in place and shall be maintained in a functional condition at all locations until construction is completed and soils are stabilized and vegetation has been established. Thereafter the permittee shall be responsible for the removal of the barriers. The permittee shall correct any erosion or shoaling that causes adverse impacts to the water resources.
12. The permittee shall hold and save the District harmless from any and all damages, claims, or liabilities which may arise by reason of the construction, alteration, operation, maintenance, removal, abandonment to use of any system authorized by the general permit.
