## DIGITAL APPENDICES

---

This appendix contains a figure for each geomorphology transect with a cross-sectional channel profile (top panel), thickness and composition of substrate-overlying deposits (middle panel), and thickness and composition of the substrate layer for each geomorphology transect (bottom panel). Note that in all three panels the view of the channel is facing downstream. The depths to the substrate over-lying deposits and to the substrate layer that were used to construct cross-sectional profiles were standardized to 34 ft (10.4 m) for transects in Pool C, to 40 ft (12.2 m) for Pool B and 46 ft (14.0 m) in Pool A.

### CONTENTS

#### *Digital Appendix*

1A: Ice Cream Slough Run - Transect 81 (straight) .....	Pg DA-4
2A: Ice Cream Slough Run - Transect 82 (curved) .....	Pg DA-5
