The Capitol
Tallahassee, FL 32399-1300

Dear Governor DeSantis, President Albritton, and Speaker Perez,

Under the leadership of Governor Ron DeSantis, the South Florida Water Management District (SFWMD) and Florida Department of Environmental Protection (DEP) have made incredible progress on Everglades restoration projects including significant advancements building water storage north, south, east, and west of Lake Okeechobee while also enhancing the resiliency of the state's largest water management system. 75 significant restoration milestones have been achieved over the past six years for the benefit of more than 9 million Floridians and the communities in which we serve.

Our agencies continue to ensure environmental restoration and resiliency advance expeditiously to support taxpayers' investments in our water management infrastructure and protection of our natural resources. We are just as focused on getting the job done efficiently. The SFWMD and DEP are lean organizations that continue to optimize resources to achieve more with less.

On behalf of the SFWMD and the DEP, we are pleased to provide you with the 2025 South Florida Environmental Report, a consolidated compilation of reports and information in accordance with Subsection 373.036(7), Florida Statutes.

This peer-reviewed, three-volume report provides the science and data used to drive decisions at the South Florida Water Management District. The report also documents restoration, water quality, scientific and engineering accomplishments in the Kissimmee Basin, Lake Okeechobee, Everglades, and South Florida's coastal areas during the 2024 Water Year (WY).

The full report is available online and covers environmental information of WY 2024 (May 1, 2023–April 30, 2024) and budgetary information for the SFWMD Fiscal Year 2024 (October 1, 2023–September 30, 2024). The report and a summary of highlights as well as previous consolidated reports are available at [SFWMD.gov/SFER](https://www.sfwmd.gov/SFER).

Thank you for your support as we work together toward restoring the Florida Everglades and helping to keep Central and Southern Florida a great place to live, work, visit and raise families.

Respectfully,

Adam Blalock, Deputy Secretary
Florida Department of Environmental Protection

Respectfully,

Drew Bartlett, Executive Director
South Florida Water Management District
