

# WATER SHORTAGE WATCH BRIEFING

*Keeping an Eye on Water Supply*

## Report for June 15, 2011

To keep the public informed about dry conditions impacting much of Central and South Florida, the South Florida Water Management District (SFWMD) is issuing the following briefing.

### District-wide Conditions

Extremely low rainfall totals at the onset of the wet season have intensified ongoing drought conditions. The wet season is off to its driest start in more than 20 years, following below-normal rainfall levels that began in October. Persistent rainfall is needed to replenish groundwater, canal and lake levels that are visibly depleted.
