

2011 WATER WATCH

Keeping an Eye on Water Resources

District-Wide Conditions for November 21, 2011

The South Florida Water Management District (SFWMD) is issuing the following briefing:

The 16-county region remains under a water shortage warning. The drier-than-normal forecast for the next several months of the dry season indicates there could be a return to water shortage conditions in the spring. The District continues to store as much as water as possible while providing flood control when needed.

Lake Okeechobee Levels

Today	13.83 feet
Historical Average for Today	14.92 feet
This Date One Year Ago	13.13 feet
One Month Ago	12.63 feet
One Week Ago	13.80 feet

Water Conservation Measures

- South Florida is now under the District's Year-Round Landscape Irrigation Rule that limits residential and business landscape irrigation to two or three days per week based on location.
 - Some city and county governments have adopted local ordinances that differ from the District rule and may further limit landscape irrigation. To determine watering days and times in your area, contact your local government or visit www.sfwmd.gov/2days.
 - Customers of the West Palm Beach and Lake Worth utilities remain under local orders that limit landscape irrigation to one day per week.

- After months of cutbacks as directed by the District's water shortage orders, permitted water users such as nurseries, agriculture, golf courses and utilities are required to continue following the water use conditions in their permits.
 - Copies of water use permits can be found in the Application/Permit records search online at www.sfwmd.gov/ePermitting.
- For information about water conservation, visit www.savewaterfl.com.
- Information about current weather and water conditions can be found at www.sfwmd.gov/waterwatch.
